

## BLUETOOTH LIGHTING MADE SIMPLE

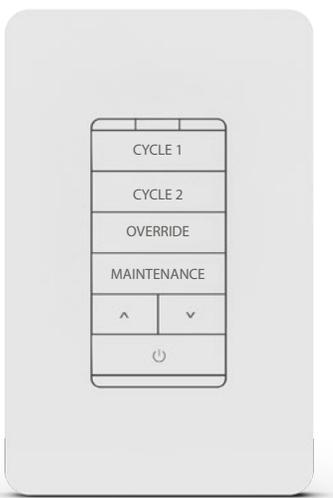

Avi-on App

### Grow with Avi-on horticultural controls

Scientists and lighting companies have spent years researching the effects of light wavelength and other growth parameters on crop production. Avi-on fixture partners have combined our ability to create and run tailored day/night routines with their highly-tuned LED systems to provide significantly improved yield and compressed grow cycles as compared to traditional metal halide systems.

Please contact us to learn how our controls have become a key ingredient in developing fully optimized indoor grow lighting solutions.

Scene Controller

- Gateway-free, Distributed Control**  
Scale to thousands of fixtures without a single gateway or network connection. Easily reconfigure and move racks without re-commissioning the controls
- Hassle-free App Programming**  
Intuitive tools enable rapid setup and reconfiguration of schedules, light levels, etc. by local personnel
- More than Lighting Control**  
Use Avi-on's high scale wireless network for collecting sunlight, moisture, flows, fans, and other key data
- IT-friendly Policy**  
Run stand-alone or cloud connected without heavy networking systems
- Optional Cloud Connectivity**  
Manage user access control, device configurations, remote diagnostics, and future reporting/upgrades with a robust, utility-grade platform and web application

# Avi-on believes that lighting controls should be simple.

With decades of experience at the forefront of industrial networking and IOT technology, we built a unique, patented Mesh platform based on Bluetooth® technology. We liberated the fixture from the circuit, and the switches from the walls. Then we added mobile and web-based management tools that liberated the customer from the tyranny of programming and maintenance. At Avi-on, simple means easy.

Horticulture Fixtures integrate w/ Avi-on Fixture Adapters & Modules

Distributed control allows any fixture to be in any group or scene, thus enabling tailored lighting for multiple crops

Avi-on Scene Controller/Override

## Controls made easy

Create and run tailored day/night routines with their highly-tuned LED systems to provide significantly improved yield and compressed grow cycles.

## Virtually unlimited coverage

Avi-on mesh provides worry-free wireless connectivity and can grow as your needs do.
